Lynxspring Learning Center

The Lynxspring Learning Center is an extensive library of Niagara computer-based training modules that support our solutions and products and further helps our partners to innovate with our technology and grow their business.

When it comes to N4, everything in our Lee's Summit on-site certification class is available creating the opportunity whereby a user can become "certification prepared" without leaving your office. If seeking the Niagara Certification, the user is required to attend an authorized certification location to take and pass the proctored certification testing.
